ABOUT US

Integrated Batteries has been serving in the power conditioning industry for past 28 years now. With our valuable experience of serving the power needs of the industry for many years in year 2013 we opened a new vertical dealing in solar energy.

Integrated Batteries India has the vision to make solar energy as the nation's mainstream power supply. We help to create a world completely independent from fossil fuels by helping people understand the importance of environmental protection, realize the advantages of solar power systems, and promote the incentives and rebates from governmental renewable energy policies.

In year 2015, with the aim of making Solar energy more affordable to our customers we set up our own Solar Panels manufacturing line and introduced the solar range with the brand name: "IB Solar". Our Solar Panels manufacturing line- a strategically located, state-of-the-art, ISO 9001:2008 ISO 14001 facility based in Noida, U.P with the total production capacity of 90MW. Our module sizes range from 3wp Wp to 380Wp in Poly and mono and are IEC/MNRE approved suitable for Indian markets.

Apart from Solar Panels IB Solar has other product line in its portfolio such as Solar Tubular batteries, Solar LED Lighting to offer complete solutions to our customers.

We are working closely with our associated distributors/ Channel partners and leading EPC players based in Delhi-NCR, Haryana, U.P., Punjab, J&K, Uttarakhand, M.P., Rajasthan, Jharkhand and exploring other areas for expanding our distribution base of Solar Products. In addition we are maintaining good tie-ups with Government/ Public sector bodies for Solar projects such as - Installation and commissioning of Solar Street Lights, Solar Home Lights, Solar Power Plants.
